

Gujarat Industries Power Co. Ltd

Vocational Industrial Orientation Program for Students

Overview & Objective:

Corporate executives and educational leader are calling for a paradigm shift requiring a combination of academic and vocational training. GIPCO recognizes the importance of vocational training with primary purpose of preparing individuals, especially the youth in the age group of 21-25 years, for the world of professional challenges and excellence and to make them employable for a broad group of Industries.

The main objective of this course is to provide overall knowledge of industry and to provide an insight as to how it works. Students need to know how to apply the skills and knowledge in creative and dynamic ways. The course fosters the importance of having adequate product knowledge to ensure safe, reliable and economic operation using different types of machines & equipments.

The course content, which aims to provide a solid foundation and an opportunity to under / post graduate engineering students for an onward transformation from "**Institute to Industry**", shall include:

Course Content:

- Basic working of Industry and role of engineer in Industry.
- Feeling the importance of their branch/knowledge and interdependence with other branches of engineering.
- Work in different department and familiarization of each department and function of different department for running Industry.

Training Methodology:

- Classroom training
- Interaction / case study
- Live Demonstration of working of equipments
- Plant Visit
