Sr. no.	Conditions	Compliance
01	No change in the calendar plan including excavation, quantum of lignite and wastes/OB dumps should be made.	Complied During monsoon the mining operation is being temporarily suspended due to sticky nature of soil which does not allow mining operation.
02	The top soil and OB dumps should be stacked in earmarked dump sites. Garland drains along the lease boundary along with the settling tanks should be made.	In the initial years, top soil and overburden wastes were stacked separately and the top soil has been used for spreading over the reclaimed land of back filled area and external dump for successful grass and tree plantations etc. Currently the top soil that is removed is being used simultaneously for progressive reclamation of back filled area. The external OB dumps have been developed in the Vastan Lease area. The dumps are of approx 50 meter height. The external dump overburden area is 217 Ha to accommodate about 85 M.cum of overburden. The dump has been stabilized and about 125815 plantations have been done in the about 94 Ha area of the external dump.  Garland drains and settling tanks are made to arrest silt and sediment flows from soil and before & during 2019 monsoon garland drains & settling tanks are maintained for the same.
03.	The level of SPM should not exceed 500 ug/cum at any station within the leasehold. Emission of SO <sub>2</sub> , Nox and CO should be maintained below the levels prescribed by the competent authority.	The level of SPM, SO <sub>2</sub> , NO <sub>2</sub> , CO emission is being monitored bi-monthly. Data related with each of the above parameters are within limits prescribed  The last quarterly report (i.e. <b>Jan.-20 to March-2020</b> ) has already submitted vide letters no - <b>SLPP/Vastan Mine/Quarterly Environment Report/1647, dated 24.06.2020</b> and current half yearly report (i.e. <b>Jan.-20 to June-2020</b> ) is enclosed herewith as <b>ANNEXURE – C</b>
04.	The quality of effluent finally discharged should conform to the standards prescribed under GSR422 (E) dated 19.05.1993 and 31.12,1993.	There is no solid or liquid waste being disposed from the mine. Further, no lignite is being storage in the mine during monsoon season. Only rain water, which collected in monsoon, season, is pumped out in monsoon period only for resuming the mining activity. This water is being sampled at various stages and analyzed. Result is reported well within the prescribed limits.  The Last monsoon water analysis report has already been submitted to Regional Office (WZ) at Bhopal
